REVISED CLAIMS

APPLICATION NUMBER; 10/784,839

FILING DATE; 02/21/2004

CLAIMS

1. A colour coding labelling device comprising a coloured plastic cap, the cap including an upper plate and a sidewall extending downwardly from the perimeter of the plate, and a wood or wood compound plug substantially filling the cavity defined by the upper plate and sidewall, the plug being retained within the cavity by a formation extending around the bottom edge of the sidewall and the bottom face of the plug surrounded by the formation being exposed so that it can be adhered to the base of a socket in an object to be labelled.
2. A device as claimed in claim 1, wherein the formation is a lip or return which engages a shoulder adjacent to the bottom face of the plug.
3. A device as claimed in claim 1 or 2, wherein cuts extend upwardly from the bottom edge of the sidewall permitting the sidewall to flex thereby allowing insertion of the plug.
4. A device as claimed in any preceding claim, wherein the upper plate of the cap carries printed, engraved or moulded text and / or shape and/ or other design.
5. A combination of an object having a socket formed in its surface and a device as claimed in any preceding claim secured in the socket by adhesive.

6. A combination as claimed in claim 5, wherein the device as claimed in claim 2 and the wall of the socket contains the sidewall of the cap and prevents the lip or return from disengaging from the plug.
7. A combination as claimed in claim 5 or 6 wherein the object is formed of wood or wood compound.
8. A combination as claimed in claim 7 wherein the object is a cutting board or chopping block as used in food preparation or any object made of wood or wood compound.
